Native America Project

Tens of millions of people in over 500 Nations have occupied the continent of North America for tens of thousands of years. They are still here. Europeans arrived in force beginning in 1492. Over 90% of the Native people disappeared.

Disease, war, enslavement, imprisonment, starvation ... dispossession of the land.

North America is sacred land. There is a difference in the ways of Native Americans and Europeans. The land knows the difference.

The *Native America Project* records the dispossession of Native peoples between 1500 and 1900 with over 15,000 placemarks on Google Earth, with texts, live web links, historic maps, photos, art, video, and a massive online library for scholars and students.
